

UNIONCAMERE
LAZIO

CAMERE DI COMMERCIO DEL LAZIO

THE BIG FIVE SHOW

23RD TO 27TH
NOVEMBER 2008

DUBAI

| International Convention & Exhibition Centre |

things made to build the future!

Unioncamere Lazio, in representation of the five associated Chambers of Commerce of Lazio Region, operates to promote and improve, both in Italy and abroad, all the entrepreneurial regional system.

Unioncamere Lazio:

- promotes and carries out investigations, surveys, studies and publications;
- participates in programme agreements;
- draws up protocols of understanding and conventions;
- can constitute and participate in bodies, institutions, organisations, companies and consortia which operate within the sphere of the Chambers of Commerce's institutional and promotional objectives, both in Italy and abroad;
- undertakes to propose, develop, coordinate and manage, as a network, the activities and services of the Chambers that concern the entire regional territory, or, in any case, those which concern an area larger than a mere provincial district;
- contributes to spreading an economic culture, which supports the participation of Lazio enterprises (especially those of small and medium size) on international markets, as well as drawing foreign investments into the regional territory.

The **National and International Promotion Affairs Area** of Unioncamere Lazio, organizes, accompanies and follows the promotional initiatives abroad of the companies from the Lazio Region, sometimes also in close cooperation with Lazio's individual Chambers of Commerce, attends the needs and the necessities coming from the companies about the foreign markets and seeks the coordination with the institutional bodies assigned to the development of the projects for the internationalization.

The participation in this 22nd Edition is organized by:

in cooperation with:

Bernardini Lavorazione Marmi

Bardiglio and Carrara Marble are still the most important type of marble for this beauty and ability to express the full glory of marble. Used in far-ranging and important works for prestigious interiors.

Bernardini owns the quarry and since time immemorial it has been processing in its plants to make works of a great artistic value for interior decoration.

Blocks and slabs are available at the warehouse of Bernardini Lavorazione Marmi (Roma), Gruppo Bernardini Marmi s.r.l. (Carrara), GLD s.r.l. (Carrara).

Romanartis

di Marcello Cicchinelli

Based in Rome, the eternal city and centre of art and civilization, ROMANARTIS specializes in designing classic decorative inlaid stone and mosaic floors, walls, tabletops and sculptures worked according to the tradition of classic Roman craftsmanship.

Our experts are also masters in the art of restoration and repair of sculptures, inlaid stone and mosaic surfaces, with experience on the most well-known churches and monuments in Italy and South America.

We also produce modern luxurious decorative panels, handcrafted in semi-precious stones (Pietra Dura) and gold, suitable for interiors as well as exteriors, swimming pools, terraces, walls, tabletops, bathrooms, yachts, and any other application where elegance and opulence are key.

All our creations are handcrafted, unique and available on custom order in any size and combination of colours to suit your interior needs and with your personal taste and style in mind.

Contact Name Giulio Sanso'

Chemical Riv

Chemical Riv S.r.l. was founded in 1973 by the current president Engineer Guido Sansò with some of his assistants and in that same year it began production of plastic coverings and paints on its own licence.

With regard to the foreign market, a contract of technical collaboration was recently concluded with a Brazilian company for production in loco (San Paolo) of the restoration line and the Perfume of Spring line (special water-based products). Research studies for finding painting products with low environmental impact with the partial or total replacement of solvents, which when evaporating create atmospheric pollution, have led Chemical Riv S.r.l. to produce water-based paints for wood and iron, varnishes for wood floor, traffic paint, anti-dust paints for flooring, all used in hospitals, schools, tunnels, etc. where the presence of even odourless solvents is toxic and dangerous both for the workers and for the personnel in charge. The entire range of paints and varnishes is produced by Chemical Riv S.r.l. in its factory of Pomezia. These include the mineral paints with a lime and silicate base used in the restoration of historical centres because of their inherent transpiration properties. The many years experience in the field of plastic coverings, water paints and waterproofings means that Chemical Riv S.r.l. is today a company that can respond to every not only aesthetic, but also functional and economic requirement, in modern architecture, restoration and internal furnishings.

The experience gained in these almost thirty years of life of the company is made available to the clientele to find solutions that best suit their requirements and to use materials most suitable for the job in hand.

branch offices (U.K., Ireland, Russia, Ukraine, Asia Pacific, Brazil, Spain, Canada) and extensive network of representative offices.

Operating in the Gulf area and in all the Middle East Countries since 1995.

Fonderie Viterbesi

FVGroup is an artisan company established in large manufacture of outdoor lighting and urban furniture. The company manufactures a wide range of products including benches, lamp-posts and lanterns for modern and historic urban centres and landscape designs. The Company made significant progress through the 1980s' when it was the first to use the ductile cast iron for hydraulic engineering. It continued to grow in the 1990s' achieving high levels of success in international markets for garden and urban furniture. FVGroup as it is known today comprises of different divisions. As a direct result of continuous research and development the Group specialises in amenity and street lighting, garden furniture and production of mechanical components. FV Group is one of the few Italian companies to own and operate its own foundry. This guarantees product quality at every stage of the production process. FVGroup is certified to ISO 9001:2000 in development control, production scheduling and the production process. FVGroup is also concerned about the environment. They promote "Recycle Cast Iron" inviting other producers to recycle their cast iron at the FVGroup recycling facility. Each cast item is specifically designed and made for different individual architects and clients. This often requires new technology development. This fund of experience is considered unique in the world. The many different styles available are displayed in product catalogues using international designers and an excellent in-house design team. The "IT Light" catalogue features street lighting and modern architectural urban amenity lighting. The "Vertik" and "Lunaway" catalogues display lighting of gardens, residential and commercial areas, urban furniture and special custom made solutions.

Meridiana

Meridiana s.r.l. established in 2005 by two sellers with a 10 years experience in international trade, acquired in the ceramic district of Civita Castellana, had a double aim: 1) to produce bathroom furniture complements thanks to a careful and detailed research in contemporary living spaces designed by major European architecture studies and entirely made in Italy; 2) represent, on the international market, several made-in-Italy firms of Civita Castellana district, which have invested in quality and design. Since its beginnings the firm benefits of an international communication service provided by Marta Francocci, journalist, radio and TV author (RAI 3, RAI EDUCATIONAL, RAI RADIO 3, SKY Cult channel), producer of programs about urban development, modern architecture and design. Such collaboration provides Meridiana with important insights into market trends and especially in those markets in which quality is the main customer requirement.

After 2 years of careful experimentation in models and products, today, the company boasts a stock of sanitaryware and washbasins, whose main features are cutting-edge design and originality in colours and style.
